

Everything you find in Salin de Biosel's products

Bioséquentielle. **The ultimate revitalising formula.**

Bioséquentielle is Christian Colotte's innovative idea that manages to reproduce the ascending movement of nutritional properties found in the plant world. Following this extraordinary formula, all Salin de Biosel skin care products contain extracts from: roots, bark, leaves and flowers, maximizing the power of their different, yet complementary nourishing properties. The phytotherapeutic selection of extracts and the sequence in which they are combined (the real secrets of the Bioséquentielle formula) transfer new sensorial stimulants of well-being to the skin, providing a natural concentration of vitality and energy to the face and body.

Our commitment

Salin de Biosel's products are made by rigorously selecting natural ingredients in order to guarantee the best quality and verify their origin. On this basis we can affirm that Salin de Biosel does not use genetically modified organisms (GMOs), animal-derived or animal-tested ingredients nor substances derived from petroleum. We are firmly committed to offering consumers products that are constantly being improved, both in terms of their naturalness and safety.

East meets West. **On your body.**

Another fundamental element of Salin de Biosel's philosophy is Oriental bioenergy: the balance between Yin and Yang, the two opposing, yet complementary energy forces create harmony within the universe and the individual and has an equally powerful effect on the skin. Yin calms the energy surplus in skin functions while Yang compensates energy for deficits. The unique energetic identity of each and every Salin de Biosel product restores the original balance of the skin, generates an intense vitality and provides new radiance.
