

Hydr'Actif Masque

A Yin and Yang vegetable formula that quickly and remarkably helps the skin regain its energetic potential.

BIOSEQUENTIELLE ACTION

A rare but highly dynamic Bioséquentielle formula, made with two leaf extracts and two different roots, combined with vegetable proteins, one type of algae and a firming complex. Its anti-redness and healing effects are immediately noticeable. A revitalised skin becomes more compact. One of the extraordinary properties of this mask is that it can be fully personalised* with vitamins and oligo-elements.

ENERGETIC ACTION

This gel mask has a neutral polarity and is made with two Yang leaf extracts that enhance healing energy and two Yin roots that soothe irritation and redness caused by Yang energy. This synergy makes it possible to immediately restore the skin's energetic potential right after the first application, with noticeable results.

APPLICATION

Whether personalised* or not, apply a slightly thick layer of the mask on the face, neck and bosom. Leave it on for at least 5 minutes for a quick surface skin effect, and up to 15 minutes for a deeper, long-lasting action. Rinse with cool water and finish the treatment with the recommended serum or cream.

RESULTS

It relaxes and refreshes the skin. Features are relaxed, the epidermis is purified and remarkably more radiant. A more compact skin redesigns facial contours.

BIOSEQUENTIELLE FORMULA

Flower	Mistletoe	Its vasodilating properties have a regenerating effect. It also activates the draining of water and uric acid, restores health and vitality to skin cells, and has a healing effect on skin tissue.
Leaf	Lettuce	Its refreshing and re-mineralising properties revitalise and tone skin tissue and combat irritation around the eyes.
Bark	Enula campana	Its diuretic properties encourage the elimination of toxins and strongly revitalise skin tissue.
Root	Burdock	By contributing to cellular regeneration, it improves osmotic exchanges to combat cellulite while revitalising and firming up cells.

COMPLEMENTARY INGREDIENTS

Macrocystis Pyrifera Algae: Their anti-collagenase action increases the elasticity of skin fibres by preventing enzymes from deteriorating collagen and encouraging the generation of elastin.

Wheat Proteins: Being rich in amino acids, these proteins nourish skin tissue, which in turn improves their elasticity and toning.

Firming Complex: It provides perfect oxygenation to skin tissue, revitalises cells and makes fibres more compact and firmer.
